

Hello fellow divers !

Ol'man winter is finally getting out of here and we are about to spring into some great divin' weather. The winds have died down and the fish reports and viz has been real good. Water temps on the bottom of 73. It is time to get ready for some great Gulf divin'. I will get you caught up on the latest.

WEST PALM TRIP

Our trip to West Palm Beach was a great success. The dives were great. We had some winds up but the seas were not that bad. It was nice to see Turtles and plenty of reef fish. Jim Meere and I got to free up a small Loggerhead turtle that was stuck under one of the reefs. Even had a 50 pound Cobia swim right by me. Of course not a spear gun in hand. We also dove one of the wrecks they have there in 80' of water. Very nice dive and the wreck is in very good condition. We are planning another West Palm trip for June 18th to the 20th. We leave on a Friday and dive Saturday morning and Sunday morning. Total cost for the trip is just \$350.00 for 2 days of divin' with tanks and fills included. It also includes 2 nights hotel with breakfast in the morning and a free happy hour. Now that is what I call a nice trip ! We also car pool to save on money and this helps to make the trips more affordable. If interested call the shop to get onto the list. This trip will book up fast ! Call today !

KEY WEST TRIP VANDENBERG SINKING

Ever see a very huge ship sink? Well we will be off to Key West to witness the sinking of the Vandenberg. This ship is way over 500' long and will be the largest ship sunk in the Florida keys as an artificial reef. This is going to be very exciting to see. We have scheduled a trip to see the sinking and it is set for May 20th to the 24th. This will be 5 days and 4 nights. Hotel and dives will also be included along with seeing the sinking of this massive ship. Cost for this trip will be \$600.00. We will car pool to Ft Myers to take the ferry to Key West and then taxi to the hotel. We have scheduled with a dive shop in Key West to see the sinking and dive on it as soon as we can. Usually a day or so later after the sinking. They have to be sure all the ordinance has detonated and safe to dive on. We have 9 divers for this trip already and are looking for more. Call the shop ASAP to get onto this trip. Don't miss history being made !

COZUMEL FLY OVER TRIP

Yes we will be booking a July trip to Cozumel. I am sure by then all the hype on the swine flu will be over. I have been in touch with Coz and they don't have any problems with the flu there. It is business as usual with no problems and the boats are full ! This trip will take us by air from Tampa to Cancun and then ferry over to Coz. We will be staying at a bed and breakfast there and divin' 3 days. Cost for this trip is still only \$899.00 for 6 days and 5 nights. Call the shop if you are interested in this trip. Cozumel is still one of the best and most beautiful destinations in the world and still one of my favorite dive spots. It just has so much to offer as far as reefs and coral formations and fish.

NEW ITEM

New this year we have spear gun racks for the boat that bolt on and the guns just slide right down into the rack handle first. This secures your spear guns so they are not lying on the deck where an accident can happen. Spear tips are very sharp and it does not take much to get cut by one. We also have spear shaft holders. Cost for this great invention is \$119.00 for the 2 gun holder, \$139.00 for the 3 gun holder, and \$159.00 for the 4 gun holder. Shaft holders are just \$24.99 and holds 7 shafts. Come by the shop to check them out. They are made real tough and will hold up very well no matter what the conditions.

USA MADE DIVE SKINS

Here in stock now are great dive skins. I have been looking for good dive skins for a while now and finally found them. Not the cheaply made Taiwan types. These are American sizes. Not only great looking and

great quality but at a great price ! Just \$79.99 each and right now I am running a 10% discount on them. Come on by and check them out and try one on. You will just love how they feel and they are the heavy duty skins. Not the thin ones. Great for summer divin' to protect yourself from the jellies or coral scrapes but can also be used to help slide in and out of your dive suit. And keep the summer UV's off of you !

DEEP SEE WET SUITS

Now that winter is over the water temps are still a bit cool. So it is still time to wear a 3 MM suit or for some of you a shortie suit. We have a full stock of suits in and keep the line full all of the time. With the great quality of these suits and a great price they fly off of the rack ! Shorties are \$79.95 and the full suits are \$139.95. Now I am taking \$10.00 off of the price of the suits for the rest of the month. Stop on by and check them out. If you have been looking for a good suit at a great price here it is ! Forget Craig's list or E-bay. Who wants to wear a suit that someone pee'd in? No me !

IST CLOSE OUTS

We have a few of the fantastic IST Titanium lined wetsuits left in stock. These suits are also complete with zippers on wrists, legs and neck. You slide right in and out of this suit. Being lined with Titanium it is equivalent to a 4 MM with the 3MM flexibility. These suits sell for over \$200.00 and now on sale for only \$159.95. Don't miss out on this close out. They do not make this suit with the lining any more ! Sizes I have in stock are mens M/L-1, mens Lg-8. Ladies size 5-1 and ladies size 7-1.

BCD SALE

I have in stock jacket style bcd's that are weight integrated. Sale price on this well balanced bcd is just \$349.00. This is our own Caribbean design model USA made right here in Florida by a company that has been in business over 29 years. This is a tough nylon jacket bcd with double zig zag stitching and it comes with a lifetime warranty. Best of all we service this unit free of charge as long as you own it. This save you \$25.00 per year on servicing ! Come on by and check it out. If your are due to replace your old bcd then this is the one for you !

ATOMIC REGULATORS

As far as I am concerned this has to be the best reg on the market. These people have put together on hell of a breathing reg that requires no adjustments diving in currents or at depths. It is totally self regulating. We all have had bad breathing regs and in adverse conditions it is kind of scary when the reg does not deliver easy breathing air. The Atomic brand makes only one great reg. But they have it in many models. The chrome type has a mixture of metals in it that does not let it corrode like other regs. Take it from the salt water and hang it right up ! No corrosion ! Try that with your reg ! It will be green in no time. Atomic also makes the stainless and the full Titanium. The Z2 is priced at \$429.00 and it is on sale at 10% off for the month of May. If you have been thinking of replacing your reg then think Atomic. Why settle for less? Best of all the Atomic reg has beat out EVERY other reg on the market today on the bench tests and the open water tests. When I was looking for a high end reg I looked for a long time. Most I looked at fell by the way side. Atomic surpassed them all ! Check them out at www.atomicaquatics.com and see for yourself or just stop by the shop to see one for yourself.

OCEAN DIVERS REG

For those of you who are looking for a more economic reg we have the Ocean Divers Reg. You may not recognize the name but it is put into may private labels. Ours is ProMate. This easy breathing reg is tops for the money. You manually adjust the side wheel when you need more air delivery and it delivers well. We have had these regs in stock for many years now and without ONE failure ! Now that is dependability ! It is twice the Oceanic regs we used years ago. The price is right at just \$299.00 for fist and second stage. Many dive

companies have put these regs into line for deep divin' also. So if it can be used to 300' you can sure use it for recreational divin' ! Stop by to see this fine reg. We have plenty in stock.

AIR FORM DIVE SANDALS

I love them ! I have used these now for months and let me tell you they have Kung Fu grip with the ripple soles and they are very comfortable ! I use them in the shop and at home also. Best of all they slip right on and off. They are the flip flop type and we all know how we love those ! Now we have plenty of them in stock and more to come. They are selling like hot cakes ! Regular price is \$34.95 and I have kept the intro sale on them at \$28.95. Come on by and slip a pair on. You will not want to take them off. The material between the toes is very soft so no chaffing !

EMC14 DIVE COMPUTER

I have mentioned to you before about this fine computer using 16 pressure groups to measure O2 and Nitrogen going in and out of the body. This is one fine piece of equipment divers and best of all it gives you more bottom time than any other computer on the market today. With things the way they are divers we want as much bottom time as we can get safely. The Cochran company only makes quality dive computers for safety and long bottom times. You can also up grade this fine piece of equipment to the Nitrox mode when you are ready to switch to Nitrox. Nitrox is not only a safe breathing gas but it gives you so much bottom time you cannot imagine. More than doubles bottom times up to 60' than air. Computers allow you to multilevel dive. Meaning it adds bottom time to your dives while ascending or diving at shallower depths. Stop on by and check one out. You can use the wrist unit or have it mounted in your console. Cost for this great computer is just \$370.00. Regular price \$439.00.

WEEKI WACHEE IS OPEN

After the state had taken over Weeki Wachee they had closed the diving area for renovation. They are now open and under new management in the dive section. I have spoke to the guy who is running it and it sounds like it will be well managed. They do go by appointment and you have to go in with a shop or make a reservation with the dive operator there. Cost is \$55.00 plus tax. Rental gear is available there but no fills as of now. We will be doing dives there on a regular basis. Check with the shop for our next outing at Weeki.

Ok divers I think I got you caught up for the moment. With dive season upon us I want to remind you to get your gear in for servicing and check you tanks for visual inspections which is due once a year and the hydro testing every 5 years. Also don't forget to have your regs and bcd's checkout out. You don't want a failure while diving and like anything else since you used it last it probably just sat around collecting dust ! Be safe ! Have your gear serviced ! Also don't forget to do your check out dives before you venture out into the open water. If you need help in that we offer pool and open water check out dives. It has been a while since you have been out there and I know you are a little rusty ! Have a great dive season and be safe !

Remember if you are not out divin' or havin' fun, don't blame Sunny Seas !
